

Mines and Mining Stocks

SHAFT NEARING 700-FT. LEVEL

Beaver Carbonate Will Drift to Big Ore Bodies at Depth.

Grant Snyder, who has just returned from a visit to the property, announces that the Beaver Carbonate shaft has now reached a point within a few feet of the 700-foot level. Within a few days a station will be cut and a drift started which will cut the enormous body of lead carbonate ore opened in the old workings. At the present time the shaft is in vein matter and it will be but a short time until the main ore bodies are opened up.

The Beaver Carbonate was formerly known as the old Carbonate and Rattler and was productive in times past of ore which sold for more than \$50.00. The former shipments show that the ore is a lead carbonate in character, averaged close to 45 per cent lead and 100 ounces of silver per ton. The property was for a time controlled by Victor Clement and a large amount of work was done at the property under his direction. The property is excellently equipped and can be expected to make its appearance among the shippers of Beaver county within the next few months.

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Palmer, Webster & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald:

Boston, Aug. 26.—After a very dull session the entire list closed very strong at top prices. Traders are still nervous over the Brown failure and disposed to stay out of the market. North Butte was the most active stock in the market and in demand. Copper Range was dull but showed no liquidation. Arizona Commercial will do better now the bond issue is out of the way. We advise the purchase of Arizona Commercial at 100; they are convertible into stock at 25 and will sell much higher. Buy East Butte and Adventure on any weak spots. Copper Range, Greene-Cannan, Butte Coalition and Old Dominion will do better.

KINDERGARTEN ORE SHOWS HIGH VALUES

H. B. Cole yesterday showed his friends a certificate for the sample of Seven Troughs Kindergarten ore taken by Mr. Cole during his recent visit to Seven Troughs. The values shown are remarkable. One from the shaft across fifty-two inches of the vein showed values of \$38. Another across one foot of the vein at water level showed \$3.70 in gold and silver, while a sample across eighteen inches showed \$1.80.

1908 Model X Stevens-Duryea

Unit Power Plant
Three Point Support
Motor 4 1/2 Bore 4 1/2 Stroke
Wheel Base 124 Inches
Weight 2650 lbs. 36 H. P.

Four touring cars is our entire allotment for 1909. You surely should investigate immediately. Price, \$2,750.00.

SCOTT SECURES THE WILD BILL

Will Start Sinking Shaft to the 1,000-Foot Level at Once.

A deal was yesterday concluded which will involve extensive development work in Beaver county. The bond and lease on the Wild Bill group in the North Star district, held by Samuel Tarbet and associates of Salt Lake, was taken over by A. W. Scott of Salt Lake, Rawhide and Pioche. Mr. Tarbet and his associates still retain a substantial interest in the bond and lease on the property and Mr. Tarbet will be in charge of the work at the mine.

Last week Mr. Tarbet and his associates secured a bond and lease on the Wild Bill which extends for a period of a year and a half for a consideration of \$75,000. They offered the control of the lease to Mr. Scott and after making a personal examination of the property Mr. Scott closed the deal. The deal was made on the condition that the company to insure development on a most extended scale. The terms on which the lease and bond changed hands have not been made public, but the assurance is given that the first payment on the bond will be met promptly. The ground of the Wild Bill will be explored to a depth of more than 1,000 feet. At the present time the mine has been opened to a depth of 200 feet and a large quantity of milling ore exposed. It is Mr. Scott's intention to equip the property with a power hoist capable of sinking to a depth of 1,500 feet and the shaft will be sunk to the 1,000-foot level at once. The mill now located on the property of the Little Beaver company will be equipped with Wilfley tables and the grinding ore now exposed in the Wild Bill will be treated at that plant temporarily. The Wild Bill has always borne the best of reputations among mining men and Matthew Cullen, the original owner, considers it one of the best properties in Beaver county. The hoist for the property has been ordered and Superintendent Tarbet left last night for the property to begin the erection of the necessary buildings and to begin work.

FINE ORE SAMPLES FROM CHEROKEE-NEVADA

Eureka, Aug. 26.—P. J. Fennel, and Andrew Madison, foreman of the Colorado mine, have just returned from a trip to Leith, Nev., where they went to inspect the Cherokee-Nevada property, in which the former, together with a number of local people, are interested. The mine is owned by Eugene Siebold, who is superintending the work at the mine, came up to Eureka for a short time and brought word of a very favorable strike in the shaft, and the purpose of Messrs. Fennel and Madison's visit was to inspect this strike. They found things as Mr. Siebold had described them, and brought home some fine samples of copper. These samples found on any property in the vicinity of like size, the owners would immediately find themselves extremely rich. The property consists of five claims and is about two hours' ride from the station at Leith. The haul to the mine is sometimes very arduous, but the return journey is comparatively easy, and it should not cost much to transport the ore to the shipping point. Dr. Harville of Eureka has resigned his place on the board of directors and C. C. Griggs of the Uncle Sam mine has filled the vacancy thus caused.

GORDON WILL SOON MAKE FIRST SHIPMENT

Word from the Gordon Mining company's property at Pioche states that the tunnel which is opening the property at a depth of more than 600 feet has encountered a fine body of rich ore. While the work has not yet progressed far enough to determine the exact size of the ore body it is certain that it will include a large tonnage. The ore averages \$100 per ton in value and the management is now preparing a forty-ton shipment which will be sent to the local smelters during the first week in September. The Gordon adjoins the Bristol and is owned entirely by Salt Lake investors. The Bristol vein opened on the surface within the Gordon lines some time ago and the present tunnel will secure a large amount of stopping ground.

SPANISH FORK MINING COMPANY INCORPORATES

(Special to The Herald.)
Provo, Aug. 26.—The Spanish Fork Mining & Milling company has filed articles of incorporation. Spanish Fork is the principal place of business. The capital stock is \$100,000, in shares of the par value of 1 cent each, based on the valuation of the Spanish Mine claims Nos. 1 to 21, inclusive, located in the El Dorado mining district in Utah county. The directors and officers are: Hyrum Christensen, president; John T. Morgan, vice president; Andrew Jensen, secretary and treasurer; Henry Wolf, Henry Davis, Samuel W. Davis and Gomer Thomas.

NEW SUPERINTENDENT FOR THE KING DAVID

(Special to The Herald.)
Eureka, Aug. 26.—Peter Kendrick, mining engineer and United States deputy mineral surveyor, who had but recently come to Eureka to permanently locate in business, has accepted the offer of the position of superintendent of the King David mine at Frisco. Mr. Kendrick will leave to take charge of the property in a few days, or as soon as he can get his affairs in shape. During his short stay in Eureka he has made many friends, and they regret his early departure. He is glad of his success in obtaining such a fine billet.

Ore and Bullion.

Ore and bullion settlements in this city, as reported by W. S. McCormick & Co., yesterday, amounted to \$155,000 and were divided as follows: Gold, silver, lead and copper ore, \$60,000; base bullion, \$55,000.

DRAGHTSMEN AND BLUE PRINTERS.

Oglesby & Oglesby, Atlas block. Bell 3330.

UNIVERSITY OF UTAH.

Registration of students, Sept. 11 and 12; entrance examinations, Sept. 9 and 10; instruction begins Sept. 14.

The University includes the School of Arts and Sciences, the State Normal School, the State School of Mines, the Utah School of Medicine, a Department of Law and a Preparatory School.

The catalogue which describes the various courses offered, requirements of admission, etc., is sent free by the UNIVERSITY OF UTAH, Salt Lake City, Utah.

PACIFIC COMPANY WILL ERECT A MILL ON THEIR PROPERTY IN AMERICAN FORK CANYON.

(Special to The Herald.)
American Fork, Aug. 26.—Johnson & Boley, who secured a bond and lease on the Merrill group of claims, in the Mary Ellen gulch of American Fork canyon, have a force of miners working three shifts on the property. The large ledge of high grade ore which they uncovered in the surface is improving with development. The strike they made on the property about ten days ago is causing no small amount of excitement. It appears from reports of those who have visited it that it is one of the biggest surface showings ever struck in the canyon and from all indications it will get better with depth. The ore is in a ledge of lime about twenty feet wide and carries exceptionally good values. One sample which they had assayed represented an average of 20 per cent silver and 1,200 ounces of copper. Picked samples would run as high as \$150. The property joins the Live Yankee, which was a big producer in the early days of American Fork canyon, and also joins the Mary Ellen Mining & Milling company's property and is just across the gulch from the Miller mine.

DOINGS OF UNLISTED STOCKS ON EXCHANGE

The unlisted stocks showed some signs of activity during the day, but with many cases were slightly lower. Silver King Consolidated sold down to \$4. While Ohio Copper brought up \$3.35 for a small lot. Cedar was active at \$1.15. Standard Copper was at \$1.15. Utah Treasure Hunt was at \$1.15. East Tintic Consolidated was at \$1.15. East Crown Point was at \$1.15. Mineral Valley was at \$1.15. Old American was at \$1.15. Mason Valley was at \$1.15. Con. Jefferson was at \$1.15. Emma Copper was at \$1.15. Western Nevada was at \$1.15.

MINING STOCK EXCHANGE.

Market Dull and Without a Feature While Prices Decline.

The day's trading yesterday on the local exchange was extremely small and with no stock featured above the others. While there was no decided slump in any of the mining stocks, nearly all showed a slight decline in price. There were few supporting orders, and the bear movement which developed during the first half of the week showed signs of being checked. Sioux Con. still continues fairly strong around \$1.40 and some little support was accorded it by the out-of-town investors. Colorado was decidedly weak, selling down to \$1.02 1/2. There is a rumor that the coming dividend may be passed by the directors and the stock is regarded with suspicion by those not on the inside.

The number of shares sold on the regular and open board calls totaled 51,255, which brought the sum of \$1,850.50. Following are the closing quotations and record of sales made during the regular and open board calls:
